## **Projects:**

Topic: Encryption and decryption of text files Front-end User: C-programming Duration: 5 months Team Size: 4

Short Description:

- The Encryption Decryption project is intended to encrypt and decrypt text files to ensure Information security and safety.
- We have successfully implemented Encryption and Decryption of text files using BLOWFISH algorithm which takes 64-bit block text and key length of variable size 32 to 448 bitsBalloons are a reaction-based game aimed to provide the player an engaging short pass time.
- In this game, Green and Red balloons keep flying in the air and the player has to tap only on Green balloons avoiding the Red ones.
- Tapping on Green balloons fetches points to the player whereas tapping on a Red balloon ends the game.

Conclusion: Successful Partial Implementation Of The Balloons Game

Topic: CBIR using Adaptive Thresholding in Multilevel Wavelet Decomposed Image
Duration: 1 Year Team size: 4

**Short Description:** 

- The term [CBIR] describes the process of retrieving desired images from a large collection on the basis of features (such as color, texture and shape) that can be automatically extracted from the images themselves "The Technique Used Is Adaptive Thresholding In Multilevel Wavelet Decomposed Image".
- Here the features used to query are color, texture and shape Index images using low level features

Conclusion: Implementation results depict that efficiency of proposed method is better than canny edge detection method.

Topic: A Study on Effectiveness of Welfare facilities provided to Employees at WEIR BDK, HUBLI
